

Acropearl *Metallic* Premium Metallic Luxury Emulsion

Acropearl Metallic is a Luxurious Premium Metallic Emulsion Paint for interiors. Its pearl lustre finish provides a metallic look to the painted surface. Its unique formulation provides special features like anti-stain, anti-fungal, increased washability, increased durability and a pearl like elegant smoothness to surfaces like walls, ceilings, plywood, pressed board and other similar surfaces.

Directions for use :-

Surface Preparation: For best results, proper surface preparation is essential. Newly plastered surfaces should be allowed to mature for 4-6 weeks. Surfaces to be painted, should be sound, clean, dry and free from dust, dirt or loose particles, grease, chalking etc. before application of Acropearl Metallic. This should be done by washing the surface with water. All surfaces to be painted should be thoroughly sanded with emery paper 180 and wiped clean. All seepage/leakage in the surface should be suitably rectified. All fungus/algae affected areas must be treated with Acro Bioclean as per the guidelines given in the technical product literature. Apply a coat of Acroprime Interior Wall Primer and allow it to dry for 6-8 hours. For any surface undulations, apply thin coats of Rhino Acrylic Wall Putty and allow it to dry for 4-6 hours. Sand the surface with emery paper 180 and wipe clean. Apply another coat of Acroprime Interior Wall Primer and allow it to dry for 6-8 hours. Sand the surface with emery paper 320 and wipe clean.

Application: • Apply one coat of Acropearl Premium Emulsion same shade with 40-50% dilution on the primed surface to get a smooth uniform surface for better results of Acropearl Metallic Finishes. • Then apply 2-3 coats of Acropearl Metallic with 30-40% dilution with water at an interval of 3-4 hours between two coats. • Acropearl Metallic can be applied by brush/roller or spray.

For Best Result, Use
