Sand Textured Paint

Acrotex Matt

Sand Textured Paint

Acrotex Matt is a high performance paint for exterior and interior surfaces. It forms a tough thick coating which will neither flake nor peel when correctly applied on a suitable backing. It can be applied on cement /sand renderings, rough cast, concrete, asbestos cement sheets, bituminous and ferrous metal surfaces etc.

Directions for use:

Surface Preparation : All loose materials must be removed with a stiff bristle brush. Surface to be painted should be sound, clean, dry and free from dirt, grease, efflorescence, etc. Surfaces affected with algae and fungus must be treated with **Acro Bioclean** as per the guidelines given in the technical literature. All areas affected with efflorescence should also be suitably treated. For surfaces such as ferrous metals, bituminous surfaces, a suitable primer should be applied.

Application: Acrotex Matt can be applied with a good quality brush or roller. Acrotex Matt should be vigorously stirred before application. No dilution of paint is normally required. However, upto 10-12% of clean water may be added when the surface is absorbent or in hot weather application. Over dilution of Acrotex Matt may result in poor bonding, flaking or shade variation.

Drying Time: 4-6 hours

Safety Precautions: Stir the contents thoroughly before use. Do not apply Acrotex Matt during wet or frosty weather. Store the container in a cool and dry place. Wash brush / equipments in water immediately after use.
