

ACRO EX

Expanding Grouting Admixture

DESCRIPTION

ACRO EX is a specially formulated product in powder form. It is incorporated in neat cement/sand grout mixes to develop high plasticity and adhesion and also counteract the natural settlements and plastic shrinkage. It develops sufficient restrained expansion to ensure a positive degree of interfacial contact. It is an excellent product for incorporation in injection / high-pressure grouts.

ADVANTAGES

- It compensates plastic shrinkage and natural settlement in cementitious grouts.
- It gives high fluidity with lower W/C ratio for easier placement and injection.
- It gives rise to higher durability through reduced W/C ratio, lower permeability and long term performance in service.
- Chloride Free – no corrosion.
- Reliable – produced under rigid quality control and quality shall never vary.

USES

It is used in bed grouting, duct grouting etc. It greatly assists any work involving the injection of neat cement or cement/sand grouts, or polymer cement slurry.

PROPERTIES

Form	Powder
Chloride	Nil
Storage	Keep it under shed
Shelf life	12 months if kept unopened
Suitability	Suitable for all types of portland cements including SRPC
Dosage	250 gms pack per 50 Kg. Cement.

APPLICATION

ACRO EX is added to neat cement or cement / sand grout @ 250 gms pack per 50 kg. cement. **ACRO EX** is dry mixed with cement and then water may be added to it. Around 10-15% water reduction is possible.

ACRO EX mixed fluid grout should be used within 30 minutes. It is user's responsibility to satisfy himself that such products are fit for the purpose for which he intends to use it and that the actual conditions of use are suitable.

PACKAGING

Available in 250 Gm. Poly Pack.

HEALTH & SAFETY

Non-Toxic and Non-Flammable.

ADDITIONAL INFORMATION

Our technical service team is available for on-site assistance and advice in using our all products. A very wide range of our products like water proofers, plasticizers, super-plasticizers, accelerators, retarders, air entrainers, mould release agents, curing compounds, grouting products, anchor products, bonding agents and repair materials are available for all round solution of civil/ construction problems.

WARRANTY

Whilst all reasonable precaution has been considered in compiling technical data on our products, all recommendations or suggestions, regarding the use of such products are made without guarantee since the conditions of use are beyond our control.
